This is a keycap with the openSUSE symbol on top for the low-profile Cherry MX1B-L2NA switch and I printed it with a layer height of 0.18 mm.

But smaller is better!

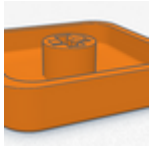

The keycap also fits, for example, on a logitech g915 keyboard if the adapter is also used.

This keycap was inspired by the following projects:

- <https://www.prusaprinters.org/de/prints/109679-cherry-mx-low-profile-keycap>
- <https://www.prusaprinters.org/de/prints/36007-cherry-mx-keycap-to-low-profile-kailh-choc-switch->

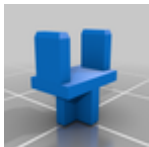

It's important that the models may have to be scaled a bit so that they fit correctly!

This remix is based on
